

# ARCA MEDICAL | HOSPITAL SIGNAGE

**IMPORTANT**

Due to the high in-rush currents generated by some medical diagnostic equipment please note that LED signs may not be suitable when subjected to rapid on/off switching cycles. Where rapid cycling may occur we recommend the use of products fitted with Tungsten Filament lamps - **Please contact our Technical Department for help with product selection.**

Please contact our Sales Dept. or visit [www.xraywarningsigns.co.uk](http://www.xraywarningsigns.co.uk) for full range of legend options.
